

MOID GHORI

Project Engineer

SUMMARY

Results-driven Mechanical Engineer with hands-on experience in pressure vessel, heat exchanger, and structural fabrication projects within oil & gas and process industries. Experienced in project coordination, client communication, site supervision, material management, and fabrication monitoring in compliance with ASME standards. Skilled in identifying and resolving project bottlenecks, coordinating variation submissions, maintaining variation records, and ensuring smooth project execution from fabrication to dispatch. Strong knowledge of project documentation, progress reporting, and cross-functional coordination with engineering, estimation, procurement, QA/QC, and clients.

EXPERIENCE

Project Engineer, Quality International Co Ltd., UAE
Sep 2024 — Jan 2026

- Assisted in execution and monitoring of pressure vessel and heat exchanger fabrication projects in compliance with ASME standards.
- Coordinated with engineering, procurement, QA/QC, estimation department, and production teams to ensure smooth project execution and timely delivery.
- Conducted regular site visits to monitor fabrication progress, resolve issues, and ensure work completion as per project schedule.
- Identified and resolved project bottlenecks affecting fabrication schedules, improving workflow efficiency and project continuity.
- Coordinated for the submission of variation offers with clients and estimation department for additional scope and design changes.
- Maintained comprehensive records and tracking logs for all project variations and commercial submissions.
- Prepared Weekly Progress Reports (WPR) and Monthly Progress Reports (MPR) highlighting fabrication status, and project milestones.

CORE COMPETENCIES

- Project Coordination and Execution
- Pressure Vessel & Heat Exchanger Fabrication
- Client Coordination & Site Supervision
- Variation Offers & Documentation Management
- Material Management (BOQ / PR / PO)
- WPR & MPR Reporting
- Cross-functional Team Coordination
- Packing Lists & Commercial Invoices
- MS Office
- SAP Business One

- Managed material tracking by verifying BOQ, Purchase Requisitions (PR), and Purchase Orders (PO) to ensure material availability and compliance.
- Maintained Material Receipt Records and verified incoming materials prior to production activities.
- Coordinated client visits and inspections, presenting fabrication progress and project updates.
- Prepared Packing Lists and Commercial Invoices for dispatch activities.

HVAC Project Engineer, ACS Enterprises, India

Jan 2023 — Jan 2024

- Assisted in execution and coordination of HVAC projects for commercial and residential buildings.
- Managed installation activities of VRF HVAC systems ensuring compliance with project specifications and safety standards.
- Coordinated with clients, consultants, contractors, and site teams for smooth project execution and timely completion.
- Conducted site surveys and reviewed HVAC layouts, drawings, and material requirements before execution.
- Monitored project progress, manpower allocation, and material availability to maintain project schedules.
- Supported preparation of progress reports, and site updates for management and clients.
- Coordinated testing, commissioning, and handover activities of HVAC systems.
- Assisted in resolving technical and site-related issues to avoid delays and improve workflow efficiency.

EDUCATION

Bachelor of Engineering in Mechanical Engineering, Osmania University

2017 — 2022

Intermediate (MPC), Nava Chaitanya Junior College

2015 — 2017

SSC, Krishnaveni High School

2014 — 2015

LANGUAGES

- English
- Hindi
- Urdu
- Telugu

CERTIFICATIONS AND LICENSES

- HVAC Design and Drafting " Acton Engineers " 2022
- Primavera P6 " Canter Cadd " 2025

ACHIEVEMENTS

- Coordinated fabrication and galvanization activities for **40 MT structural platforms and ladders** for pressure vessels.
- Contributed to successful delivery of **2 Pressure Vessels and 1 Heat Exchanger** for Ammonia & Urea Production Plant.
- Participated in execution activities for **Mozambique LNG Project** involving **93 equipment units**.
